ENVIRONNEMENTAL POLICY

Including climate change and food waste

Naya Waters has the obligation to insure sustainable management of the natural resource. This is essential for our brand and image development. That is why, we commit to our local environment.

NAYA WATERS, COMMIT TO:

Guarantee water resource sustainability and purity to ensure the quality of our products and consumer safety.

Respect Municipal, Provincial and Federal Regulations.

Apply continuous improvement in its Environmental Management System.

Protect and improve the natural heritage of the site.

Prevent pollution, reduce greenhouse gas emissions and take necessary actions related to the climate.

Exercise its social responsibility locally.

IN ORDER TO MEET ITS COMMITMENTS, NAYA WATERS IMPLEMENTED THE FOLLOWING ACTIONS:

- Understand the hydrogeology of the resource and the site's natural and human environment. Take actions to protect the water resource, avoid extracting more than what the resource can naturally produce, and prevent water waste.
- Reduce waste, reuse and recycle all recyclable materials to prevent wasterfulness.
- Follow the evolution of Municipal, Provincial and Federal Regulations with regards to Environment.
- Establish and communicate the culture of the company with regards to the environment.
- Evaluate the environmental aspects, the challenges arising from climate change and the associated risks and opportunities. Control and evaluate periodically the performance of its environmental objectives.
- Develop long-lasting relationships with local authorities and contribute to local development.
